

INTOGRATE AX - Developer

Unlimited possibility for integration between Dynamics AX and Lotus Notes.

In general

Dynamics AX has established itself as one of the leading products for managing structured data within companies' administrative routines.

Similarly, Lotus Notes is the leading system for the management of companies' less structured data such as workflow, knowledge sharing, document handling, mail and calendar functions, etc.

By integrating Dynamics AX with Lotus Notes, the combined benefit of using these systems can be further increased.

Product information

INTOGRATE AX – Developer is part of the **INTOGRATE** product line which integrates ERP systems with Lotus Notes.

The philosophy of **INTOGRATE** is that data should always only be maintained from one place. And with INTOGRATE it is possible to share these data with e.g. Dynamics AX or Lotus Notes.

INTOGRATE AX - Developer is an extension of Dynamics AX and is a robust and strong tool for all types of integration between Dynamics AX and Lotus Notes.

The product is relevant in all cases when e.g. a database in Dynamics AX contains data which might be relevant in Lotus Notes applications or which a company wants to update/maintain from Lotus Notes. Likewise, the product can be used in all cases when a company wants to integrate data from Lotus Notes into Dynamics AX.

INTOGRATE AX - Developer is easy to include in all elements of Dynamics AX and the integration with Lotus Notes can thus be built into all types of business processes, update runs, manual maintenance routines, etc. Common to the options is that data are only maintained in one place while the users can access the data in the system most relevant to them.

The product is an integrated part of Dynamics AX and therefore, it requires no competence within Lotus Notes development. **INTOGRATE AX – Developer** is an extension of the Dynamics AX application's development environment with Lotus Notes programming options.

INTOGRATE AX - Developer is easy and simple to install and requires no ongoing maintenance. The product can easily be installed together with Dynamics AX AOS, Citrix, Remote desktop, etc.

INTOGRATE AX – Developer should be used when the need for integration between Dynamics AX and Lotus Notes goes beyond mere mail and calendar integration.

Examples of use:

Since INTOGRATE AX – Developer is a very versatile and powerful tool. The product can be used for integration between Dynamics AX and Lotus Notes in several areas.

Typical integration areas are:

- ▶ Synchronization of base data in Dynamics AX with various Lotus Notes databases, e.g. debtor data.
- ▶ Integration with Lotus Domino servers and thus with the Internet and Intranet
- ▶ Situations when data in Dynamics AX must be replicated to other locations and countries where Lotus Notes can be used as the "transporter".
- ▶ Exchange of data with other systems via Lotus Notes
- ▶ Expansion of Dynamics AX by workflow facilities such as approval or alarm functions.

The below lists are examples of more specific possibilities for integration:

General ledger

- ▶ Entry guidelines
- ▶ Balance per dimension
- ▶ Replication of key figures
- ▶ Fixed assets

Accounts receivable

- ▶ Sales data e.g. by item, customer, period, etc.
- ▶ Sales data and balances for Lotus Notes CRM systems
- ▶ Contact persons
- ▶ Internet e-trade
- ▶ Internal order execution via Lotus Notes clients
- ▶ Contracts and customer agreements

Account payable:

- ▶ Sales data and balances for Lotus Notes CRM systems
- ▶ Contact persons
- ▶ Registration of scanned in purchase invoices
- ▶ Invoice approval via approval cycle
- ▶ Lotus Notes based procurement

Inventory management

- ▶ Lotus Notes catalogs with e.g. prices
- ▶ Product sheets and descriptions
- ▶ Instructions
- ▶ Replicated inventory lists of stock levels
- ▶ Bill of materials hierarchy
- ▶ Internet catalog

Production

- ▶ Instructions
- ▶ Replication of production status
- ▶ Integration with calendar and tasks
- ▶ Workflow

Shop Floor Control

- ▶ Loading of registrations via Lotus Notes

HRM

- ▶ Integration with the Intranet
- ▶ Address book

Project

- ▶ Lotus Notes-based base data (replication and mobile)
- ▶ Time registration via Lotus Notes or browser clients
- ▶ Activities per customer for CRM system
- ▶ Instructions
- ▶ Offer/Orders

Basic

- ▶ Integration with the Intranet and address book
- ▶ Training, career, extended HRM
- ▶ Document handling – both ways
- ▶ Drag-and-drop of documents
- ▶ Queries in and opening of Dynamics AX from Lotus Notes
- ▶ Integration with Lotus SameTime/Workplace
